progekta

Mobile Application Developer (Android/iOS) Intern

Progekta Europe P.C. is seeking for enthusiastic Mobile Application Developers to join an internship with our dynamic team in Metamorfosi, Athens.

The internship duties involve:

- Design, build and maintain high performance, reusable, and reliable code for mobile applications.
- Create unit and UI tests using mobile test automation frameworks and IDEs.
- Identify and correct bottlenecks and fix bugs.
- Participate in new feature architecture, design and implementation.
- Share iOS/Android expertise with team to address project requirements.
- Ensure a high-quality Unified Communications/Collaboration mobile offering.
- Interact directly with Product Management, Design, QA and server-side development as part of a cohesive agile team.
- Training and Certification included.

The technical skills include:

- Sound knowledge of iOS Foundation, tooling and UIKit and/or Android SDK.
- Fluency in Objective-C/Swift and/or Java.
- Familiarity working with remote data via REST and JSON interfaces to backend services.
- Proficient understanding of code versioning tools, such as Git, as well as build tools and techniques, such as gradle/maven.
- Experience with opensource/third-party libraries and APIs especially with cloud message APIs and push notifications.
- Training with continuous integration, Mobile unit and UI automation test tools and frameworks, such as appium, XCUITest, espresso, mockito.
- Good knowledge of mobile architectures, trends, and emerging technologies.
- Established understanding of the full mobile development life cycle and agile methodologies.
- Experience with iOS and Android beta releases is considered an additional asset.

Internship Duration variable, part-time and full-time contract possible.

We are happy to welcome all applicants!
