Full Job Description

Nespresso is looking for a **Frontend Engineer Intern** to work alongside our eCommerce team to make improvements to our website. This opportunity will be both educational and practical. The ideal candidate will be personable, creative, detail oriented, collaborative, curious, a persistent problem solver, and inclined to ask questions when in doubt.

What you'll do:

- Develop web pages and components using the traditional HTML/CSS/JavaScript web stack, jQuery or any other modern libraries.
- Fine tune existing web pages or components as required by the eCommerce team.
- Help debug UI/UX issues on existing web pages.

What the internship will provide you:

- Opportunity to contribute to the website of an international company.
- Experience making changes within an established codebase.
- Experience with the full software development lifecycle from specification design to release.
- Exposure to a fast-paced, cross-functional team within a collaborative work environment.

What we are looking for:

- Rising junior/ senior in college
- Pursuing a degree in computer science, software engineering, or related fields that involve front-end development
- Hands-on programming experience developing web pages using HTML/CSS/JavaScript, jQuery or any modern web framework
- A good sense of visual design
- Are outstanding problem solvers and can tackle tough challenges with innovative thinking and determination
- Good communicators and can work effectively in a collaborative environment.
- A thorough understanding of at least one programming language and associated libraries
- A willingness to learn more

Please send your CV to dimitra.chrysikou@gr.nestle.com.
