 Full Time On-Site Entry-Level

Position number: 1

Basic information

Job Overview

Logicom is a leading regional Distributor of Technology Solutions and Services covering a wide area in Europe, Middle East, Africa, and Asia. It is a member of the Logicom Group (Logicom Public) which is headquartered in Cyprus and listed on the Cyprus Stock Exchange since 2000.

Applying the highest standards of professionalism, Logicom is an indispensable link in the technology supply chain, facilitating mutually beneficial relationships with leading System Integrators, Service Providers and SMB Resellers.

We are currently looking for a Presales Engineer for Networking solutions. The successful candidate will be responsible for technical Planning and Designing where required, supporting our Partner Eco-system and promote Logicom's product portfolio.

Responsibilities
• Use internal and vendor tools to generate accurate bill of materials on a timely basis to serve Logicom's resellers and the internal sales team
• Provides technical knowledge
• Delivers training and workshops for our resellers
• Delivers Proof of Concepts (POC) and Demos
• Keeps up to date with new networking products that are introduced and maintains product certifications
• Presentation of networking solutions in dedicated workshops
Qualifications and Skills
• Undergraduate in Computer Science or Computer Engineering or related field
• any relevant experience would be positively considered but is not mandatory
Cisco certificates (CCNA, CCNP) will be considered as an advantage.
• Fluency in both Greek and English
• Ability to cooperate and to work within the team
