DeepSea was founded to bring world-class AI technology to make the world of shipping leaner, greener, and better connected. Our cloud platforms harness deep learning models trained on real-time data to enable our customers to optimise the routes, speeds, operation, and maintenance of their vessels, saving fuel, money, time and reducing environmental impact.

Currently, we are looking for a capable and motivated IT Intern to join our team. You can find more info at our website. See link below.
