Want to shape the future of healthcare?

As one of the most innovative and influential organizations in MedTech, we offer you a flexible and dynamic environment with opportunities to go beyond your comfort zone while working for the best cause there is: Helping people living healthier and longer. Over 65,000 colleagues of us worldwide are working hard to provide the best possible support to healthcare providers at each stage of patient care: diagnosis, prognosis, therapy, and follow-up.

Join us in shaping the future of healthcare together – We will be glad to have you **gaining your internship experience in the IT department**.

About our culture

Our culture embraces different perspectives, open debate, and the will to challenge convention. Change is a constant aspect of our work. We aspire to lead the change in our industry rather than just react to it. That is why we invite you to take on new challenges, test your ideas, and celebrate success.

About the team

You will join a team of professionals who have passion and desire to achieve great results. Your contribution will be fundamental to the improvement workflows. We help our customers optimize their operations, maximize performance to achieve better outcomes, and facilitate their path to expanding precision medicine. We are shaping the future of healthcare and we seek to go beyond what is possible today!
